

Global Village

Global Village offers a similar experience as Collegiate Challenge, but takes place on a world wide scale. Students will have the opportunity to venture outside of the United States to help improve housing situations in communities globally. This winter will be the first time that Habitat for Humanity UCLA will be participating in Global Village. We are planning to work with the affiliates in Guatemala to help build more decent shelters. Come join us on an exciting trip to Central America and be a part of the first UCLA Habitat Global Village team!
